

More than Just bricks and mortar...

ARDEN WINDOWS Ltd are proud to have been awarded the contract to supply timber windows and doors to Morris Homes flagship Cecil Square development. Nestled just inside the Lincolnshire Vales and built on the Burghley estate, Cecil Square is a

beautiful development, with a variety of different house designs. Morris Homes create high specification properties built with meticulous attention to detail making Arden an obvious choice for the high quality timber window and doors specified.

First phase of multi-school refurbishment plan completed

ARDEN WINDOWS Ltd are pleased to have recently commenced the supply of windows to a number of London schools following a successful tender award through the LHC. Having worked

on a number of smaller LHC projects in recent years supplying 800 high performance windows to a number of Victorian schools was a challenge we were keen to accept. As an approved LHC framework provider for both the supply and installation of timber windows Arden have the experience and knowledge to undertake multi-school replacement contracts of this scale and significance. To discuss any future timber window replacement schemes for all types of local authority properties, please-mail us at info@ardenwindows.net.

Morris Homes pride themselves on building properties that consistently stand the test of time as they only use the highest quality materials helping them win a number of national awards for excellence in landscaping, design, construction and energy efficiency. Morris Homes also understand that a house doesn't make a home. A home requires love, care and that little bit of magic that you can sometimes see, and always feel. So as well as focusing on bricks and mortar, they focus on the flow, the space and the surrounding area to make sure you'll feel completely at home. Arden's doors, casements and sliding sash windows align with this synergy blending in seamlessly with the nearby historic area of Stamford whilst providing market leading energy performance standards.

"It has been a pleasure being involved with Morris Homes – especially as their on-site management has been awarded the NHBC "Pride In The Job Award". Arden are proud to support them in this venture with products that not only meet but often surpass the stringent quality expectations and energy efficiency requirements stipulated in their specification."

- Kinward Heritage Sliding Sash achieves industry leading u-value of 1.1 W/m²K (see over)
- Arden Windows recognised in NHBC Pride in the Job Award

- Manufacturing lead times 4-6 weeks from sign off
- Arden Windows joins the Accoya Joinery certification scheme

Survey, design, manufacture, delivery, installation and aftercare

PRODUCT DEVELOPMENT — INDUSTRY LEADING DESIGN

Arden's recently launched Kinward achieves u-value of 1.1 W/m²K

RECENTLY LAUNCHED ARDEN'S Kinward Heritage Sliding Sash has been certified by the British Woodworking Federation using to achieve a thermal transmittance U-value of 1.1 W/m²K. The Kinward Heritage is manufactured using our state of the art Homag PP2 window processing centre utilising modern spirals and balances. Despite the use of modern mechanisms our Kinward Heritage has been accepted by a number of conservation officers across the country due to it's unique design that creates the visual appearance of a traditional Weights and Pulleys window.

The Kinward Heritage has already been supplied to several new build and

refurbishment projects within the UK and has received very positive feedback from our customers. The window has even been involved in the NHBC Pride in the Job awards!

Iain McIlwee, Chairman of the British Woodworking Federation presenting David Bickley, Director of Arden Windows Ltd with the u-value certificate

Arden Windows and the Accoya Joinery certification scheme

ARDEN WINDOWS ARE NOW able to offer Accoya timber as part of their extensive range of high quality products.
